

About Dr. Michael Gazsi, P.C.

Dr. Michael Gazsi graduated from the National College of Naturopathic Medicine in Portland, Oregon, the oldest institution in the United States dedicated to the study and research of Naturopathic Sciences.

He is licensed by the State of Connecticut, and has been in practice since 1993.

Dr. Gazsi specializes in alternative assessments and therapies, as well as in diagnosing and effectively treating acute, chronic, and irresolvable health issues.

Patients who are unable to find relief through standard medical procedures, often find relief in alternative therapies and procedures.

Auricular Therapy

What is Auricular Therapy?

Without needles or pain, Auricular Therapy is a powerful form of **Acupressure** that utilizes the **Acupuncture Points** on the body's outer ear. Using these Points, we gain access to the body's entire acupuncture system.

Acupressure Pellets made of vaccaria seeds are placed on the outer ear to stimulate the Acupuncture Points. Each pellet is left in place for up to 6 days.

An individual can **shower** with the pellets as they seldom fall off, but they should not be rubbed with a washcloth. If desired, a patient can **press** on them to accentuate their effect.

The pellets should be removed after 6 days to avoid irritation to the ear, and to give the Acupuncture Points a rest between treatments.

My anxiety disappeared within seconds of Dr. Gazsi placing the pellets on my ear. It was amazing, almost unbelievable. I repeated the therapy 4 times and each time spaced them further apart. Now I go in once every 2 months for a booster.

Mark D. Brewster, NY

What are the Benefits?

Auricular Therapy is:

- **Safe**
- **Drug-Free**
- **Non-Invasive**
- **Affordable** - A better value than Acupuncture, and safer than medications.
- **Results-Oriented** - Nine out of ten patients experience rapid symptom relief.

Six months after I broke my ankle, it was still swollen and painful. I was desperate. Auricular therapy gave me instant relief! And it only took 6 treatments to fix the problem permanently. *Joyce M. Brookfield, CT*

How long do the benefits last?

Incredibly, the benefits usually last for an entire week. Plus, the benefits are cumulative, meaning that each therapy adds new benefits beyond the last. Once symptom relief is achieved, most patients only need occasional booster treatments, if any.

Is Auricular Therapy Effective?

Auricular Therapy has been used for several decades. Studies show it to be safe and effective for many conditions including such painful conditions as: **bursitis, sciatica, and tendonitis**, plus such stress-related conditions as **insomnia and anxiety**. It also helps **speed healing** after injuries, and **controls cravings** for smoking, overeating, and foods such as sweets.

After I turned 55, I needed to go to the bathroom at least 5 times a night. Dr. Gazsi used Auricular Pellets on my bladder points and from that night on, I only get up once a night! Finally, I can sleep! *Mary P. Danbury, CT*

How many treatments will I need?

Auricular Therapy is generally performed **once a week for 6-12 weeks** depending on a patient's condition. Booster therapies may be needed occasionally to maintain benefits. Some find using auricular therapy once a month for stress and anxiety is very helpful as well.
